

Laxey Flood Support Payment

- The Flooding Incident that this payment applies to is where domestic properties have been flooded on 1st October 2019 in the village of Laxey.
- Therefore the definition of flooded properties is :
Properties Flooded are those homes where it is considered that the property has been flooded internally. i.e. water has entered the property:
 - Basements and below ground level floors are included
 - Garages are included if in the fabric of the building. Garages adjacent or separate from the main building are not included
- The definition of a **household** is where a family/ group of people live together in one property, in a bedsit or in a flat.
- For households that fit within this definition a payment of £500 for each household will be authorised. Authorisations will be checked against a list of flooded properties that is being collated by the Department of Infrastructure and the Manx Utilities Authority.
- For Houses in Multiple Occupation (HMO) only one payment will be made to the household (see definition above). It is for the household to agree the share of this payment. It is expected that such payments will need this scheme application form to be completed to determine who will initially receive the payment.
- For flats e.g. upper floors that have not been flooded (see definition above) or not affected by flooding the household payment will not apply.
- Where flooded properties were unoccupied immediately prior to or during the flood incident are excluded from the scheme.
- Where flooded properties are rented the payment is intended to be made to the tenant (household not individual) rather than the landlord.
- Where a property was flooded more than once the payment will only be made once.
- All payments will be made by cheque to the address on the application form.
- Any appeals received will be referred to the Chief Financial Officer of Treasury.
- The scheme will end in December 2019.
